CITY OF WASHINGTON, TUESDAY MORNING, APRIL 3, 1849.

THIRTY-THREE years' experience as a clerk in one or the principal accounting offices of the Treasury (3d Auditor's) has qualified the subscriber to undertake a general agency business at the sear of the federal government, and the transaction of any business with the public department, or before Congress. An intimate acquaintance with all matters of business in the several departments and bureaus, a knowledge of the laws, and the principles established by decisions in the executive departments, in relation to almost every subject connected with public accounts and transactions, with which he has become familiar from long experience in the public service, affords him advantages and facilities which, perhaps, few others possess. His attention will be directed to the prosecution of claims of every character, embracing revolutionary claims against the United States or individual States, whether for lands or money; pensions of all kinds; commutation for half pay and bouncies; claims growing out of contracts with the United States; examination of titles, and procuring patents for lands; return of duties, or remission of fines or forfeitures, under the revenue or other laws; the prosecution of claims arising out of transactions connected with the Florida or Mexican wars; claims before any board of commissioners, now or hereafter to be formed; the sale or purchase of resievate, and generally to the transaction of any and every description of business in which the services of an agent may be required.

The subscriber is extensively known in the city of Wash-

The gun shoots either buil and buckshot, or fine shot, and is a seful for both sporting and warlike purposes.

Preserving the teeth, gams, and mouth fresh, pure, and healthy; and, from the slow and insidious ravages which time is liable to cause, is the most agreeable property of Wheeler's Teaberry Tooth Wash. It prevents the decay of an antiral corruption which the progress of time gradually brings upon the teeth, expels all corrupt hamors, prevents the accumulation of tartar, and removes the almost imperceptible animalculae which are so liable to be located in the decayed cavities; and it preserves the teeth from all other impurities, and constantly tends to purify, keep sound and healthy, and greatly to strengthen and preserve them.

It keeps the gums and mouth fresh, pure, and healthy, ereating a healthy action and circulation in the gums, and by its astringency and tonic effects healing up and correcting impurities, and, together with its purifying properties and fragrance, keeps the breath sweet and pure, and preserves the teeth, gums, and mouth excellent in appearance and healthy.
